

Accessories

Pump and equipment protection

Safer facilities

More reliable processes

improving your process

Accessories to get more from your pumps

These accessories not only enhance the security of your equipment and facilities; they also protect you from the risks of accidental operation or unforeseen mishaps. In addition, they improve the integration of pumps in your processes, and guarantee lower life cycle costs by reducing your operating costs.

A
3

[S] [P] [E] Multi-purpose sensor

- Local pressure display with adjustable thresholds and transmission of the reading
- Monitoring and flexibility of operation
- Improves safety of the pump and installation

[P] [E] Pressure transmitter

- Transmits the pressure reading
- Supplies an analogue signal
- Integrates pressure management within processes

[S] [P] Pressure-sensitive switch

- Includes a contact with adjustable pressure thresholds
- Protects the pump
- Improves safety of the installation and process

[E] Pressure gauge

- Local pressure display
- Lets you monitor pump operation
- Flexible operation

[E] Adaptation for hygienic sensor

- Simplified installation of sensor
- Recommended for optimal positioning of dry running protection devices in pipework

Delasco

[S] [P] [E] Dry running protection device (Moineau)

- Controls fluid circulation
- Protects the pump
- Improves reliability of the installation and process

[S] [P] Hose burst detector (Delasco)

- Detects hose bursts
- Detects leaks in the pump body
- Protects the pump and operator
- Improves safety of the installation

Moineau

[P] [E] Frequency inverter

- Controls pump speed and flow
- Flexible operation
- Integrates the pump in process functions

[P] [E] Direct start-up box

- Local pump control
- Flexible operation
- Ideal for portable pumps

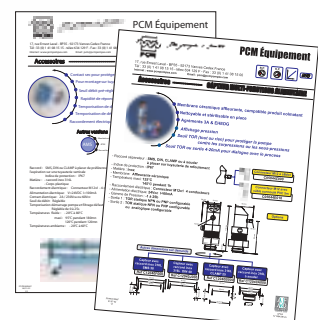

[E] Trolley

- Integration of the pump on a trolley
- Ideal for use at different workstations
- Flexible use

For more information concerning the dry running protection device and multi-purpose sensor, please refer to the corresponding technical product datasheets. These are available on our Internet site pcmpompes.com.

Applications in all food and personal care sectors.

Set of accessories for wine filtration.

Dry running protection device in wine filtration application.

Start-up box for ketchup and mayonnaise sauce transfer.
